SUMMARY

Aspiring Software Engineer and Full-Stack Developer with hands-on experience building scalable MERN stack applications and AI-driven solutions. Proficient in React, Node.js, Express.js, and MongoDB, with a strong foundation in Data Structures Algorithms. Experienced in developing real-world projects integrating real-time systems, cloud tools, and machine learning workflows. Actively seeking Software Development Engineer (SDE), Full-Stack Developer, and AI-focused roles where I can build impactful and intelligent software systems.

EDUCATION

B.E. in Artificial Intelligence and Data Science Engineering

Graduating June 2026

SPPU University

8.00 CGPA

PVG College of Engineering and Technology

Relevant coursework: Machine Learning, Full-Stack Web Development, Data Structures Algorithms

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C++, TypeScript **Libraries and Frameworks:** Tailwind CSS, Node.js, Express.js, HTML, CSS, React, JWT, Shadcn UI, FastAPI, Streamlit, Next.js, TensorFlow, PyTorch, Scikit-learn **Tools / Platforms:** Supabase, Figma, Vercel, Netlify, VS Code, Postman, PostgreSQL, AWS, Git, GitHub, Jira, Cloudinary **Databases:** MongoDB, MySQL, PostgreSQL

EXPERIENCE

Full Stack Developer Intern - MyJob Grow, :

- Collaborated with a development team to design and build websites for business clients, contributing to both frontend and backend components of production-grade applications.
- Created responsive user interfaces using **HTML, CSS, JavaScript, React, and Tailwind CSS**, delivering modern UI design and seamless user experience.
- Implemented backend services using **Node.js and Express.js** to build REST APIs, server-side logic, and application workflows.
- Managed and integrated databases including **MongoDB, MySQL, and PostgreSQL** for efficient data storage and retrieval.
- Acquired practical experience across the complete **full-stack development lifecycle**, including frontend implementation, backend architecture, and database integration.

PROJECTS

“ **DevDialogue** | [GitHub](#) | [Live Demo](#)

Engineered a full-stack Cloud Development Environment combining real-time collaboration with AI-native execution, enabling users to run Node.js and TypeScript code directly in the browser and reducing local setup requirements.

- **Integrated WebContainers API** to create an in-browser runtime supporting live code execution, dynamic npm installations, and automatic repair of missing package scripts.
- **Architected a context-aware AI agent** using Google Gemini capable of reading open files to perform targeted bug fixes, scaffold project structures, and generate real-time development assistance.
- **Implemented real-time collaboration** using Socket.io, enabling instant messaging, typing indicators, and synchronized project state across multiple users.
- **Designed a high-performance UI** using React.js, Tailwind CSS, and Framer Motion while resolving COOP/COEP security header challenges required for SharedArrayBuffer support.
- **Impact:** Enabled developers to write, run, and debug code directly in the browser while collaborating in real time, improving development workflow efficiency and eliminating local environment setup.

Vehicle Price Regression | [GitHub](#)

Built a machine learning regression system to predict bulldozer sale prices using large-scale historical auction datasets and machine characteristics.

- Implemented a **time-series regression model** trained on **400,000+ auction records and 50+ machine attributes**.
- Conducted **data preprocessing, feature engineering, and exploratory data analysis** to identify key predictors influencing equipment sale prices.
- Evaluated model performance using the **Root Mean Squared Log Error (RMSLE)** metric defined in the Kaggle Bluebook for Bulldozers competition.
- Built a structured **machine learning pipeline including dataset preparation, model training, and evaluation**.
- **Impact:** Demonstrated the ability to extract predictive insights from large industrial datasets, enabling more accurate equipment price estimation for auction marketplaces.

“

CERTIFICATIONS

“ **Nvidia Deep Learning - Nvidia, :**

- Acquired practical skills in building, training, and optimizing deep neural networks for computer vision and data analysis tasks.

Responsive Web Design - FreeCodeCamp, :

- Earned proficiency in building responsive websites that deliver optimal viewing and interaction experiences across devices, from desktops to mobile phones.

Complete A.I. & Machine Learning, Data Science, :

- Mastered the machine learning workflow, from data visualization and preprocessing with Pandas to building supervised learning and deep neural network models with Scikit-Learn and TensorFlow.

Complete Web Development Course, :

- Built expertise in full-stack development, covering frontend with React and Tailwind CSS, backend with Node.js, database management with MongoDB, Prisma, and deployment strategies.
